DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 2, 4-10, 13, 20-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 2, 10, and 13 fail to set forth any structure supporting the functioning of the ignition timing. Method claim 20 should depend on method claim 18, not apparatus claim 13. In claim 4, a mere crankshaft cannot define a direction of rotation, rather the crankshaft rotates about its longitudinal axis in a first direction.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 11-13, 18, and 19 are rejected under 35 U.S.C. 102(a) as being anticipated by Laimbock et al (6729289).

Figure 5 shows (two) pistons 4 at nearly TDC at the same time in a v-twin engine and a nearly diametrically opposed counterweight.

The engine is described as having regular ignition intervals that is deemed to mean alternate firing. Note, the engine is a four stroke as evidenced by the camshafts 8, 8a.

Allowable Subject Matter

Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3747

Claims 4-10 and 20-22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
